

+ Junior Transportation Designer

automotive **m/f**

In this position, the main focus is designing automotive, but with a specific profile allowing to be involved in light urban mobility vehicles, and eventually bikes. However, you will handle other projects as well.

Your responsibilities include taking your ideas from concept to 3D and finally to industrialisation follow up. You must enjoy a team-based environment and most importantly, transportation!

Requirements

- ▶ Breadth of vision, to work across all areas of leisure transportation
- ▶ Able to deliver across all transportation design skills, from sketch to 3D as well as engineering knowledge
- ▶ Design degree and ideally experience in automotive or motorcycle design

If you want to break new ground in your career, please contact us now by email and tell us why you are the perfect addition to our team.

Please let us know your preferred start and end date of your internship.
